

III International Congress on Technology and Tourism for All

Save the Date!

We are pleased to announce that the III International Congress Technology and Tourism for All will be held from **October 23 to 25, 2019 in Málaga, Spain**

This congress aims to show what technology, smart tourist destinations, accessible products and services can do for all people.

Like in previous editions, an important objective is to exchange research papers and communications so that the international community obtains firsthand knowledge on the latest advances in the different topics addressed.

People and their rights, innovation, as well as products and services offered are elements that must be taken in consideration in the 21st century in order to meet individual needs within a global offer.

In the 2017 edition we had well over a thousand attendees, of which more than half came from abroad. This allowed us to create an exchange network we wish to increase in 2019.

We propose a great variety of topics, areas and projects in the field of technology and tourism in order to promote the integration and inclusion of people with disabilities in society.

The Congress agenda is open to all proposals related to the following **areas and topics**:

- Technologies and Services to Access Information and Communication
- Human-Computer Interaction
- Assistive Technologies
- Telecare and Teleassistance: Prolonging Active Life
- Digital Home and Independent Living
- Robotics for Personal Autonomy
- Transport for All
- Technologies for Smart Cities
- Accessible Technologies for Collaboration and Learning
- Augmented/Virtual/Mixed Reality
- Technology Applications and Solutions for Accessible Tourism and Cultural Activities
- Tourism Regulations and Standards
- Accessibility in Hotels and Museums
- Accessibility in Cultural and Natural Heritage
- Accessibility in Transport
- Accessibility in tourism information
- Tourism activities for all (outdoor and indoor)
