As you may already know, Argonautical Park is the first modern sailing centre in the Region of Magnesia, Greece, with accommodation, restaurant, training and education camps.

Argonautical Park is the first Greek Activities Park with a focus on athletic, educational and recreational water and wind-based activities. Economic support from the European Union and private funds contributed to complete the project which began in 2004.

More than 2 million € have been invested and the centre's total worth with its 6.000 m² of surface and buildings exceeds 4,5 million €

Argonautical Park is searching for a partner who has to be a recognized private or public organization or business from the alternative tourism industry which has to be able to take over the 51% of the stocks.

Argonautical Park has many reasons to look for investors:

1. The main one is to accelerate and give status to its cause without diverting from the business goal
2. Absolves Argonautical Park's connection with banking institutions thus Bank lending is erased
3. Accelerates the centre's economic performance and financial soundness.

Economic details, plans of the centre's operation and the potential, authorized real estate evaluation; financial details from pilot projects are available for anyone that is interested.

Argonautical Park works with the immediate objective of achieving annual incomes larger than 1 million € with the existing marine and terrestrial infrastructure; and support from tourist office in Berlin where we hold 15% of the capital stock.

Best regards
Michael Binagana
